Dear Dave and Mark;

The Hoosick Local Development Corporation (HLDC) has similar concerns that all residents have over the PFOA contamination of the Village's water supply. The present and future economic impact of this disaster on the Village and the Town greatly troubles the HLDC. The HLDC has had, in its first two years of reinstatement, much interest for loan information and requests from a variety of individuals with potential business ideas. The HLDC would hope this will continue; however, this is now uncertain.

The HLDC asks that the Village and the Town in its negotiations with DEC, DOH and the EPA request that some of the funds available either be paid directly to the HLDC or that the HLDC administer some of the funds for a fee. This will provide future funding for the HLDC to support economic development that may have been lost or delayed or to support activities which would counter any residual negativity all due to the water's contamination.

Very truly yours,

William C. Johnston, Chairman
